

# TRACY VAN DER SCHYFF

Change Management and User Adoption Specialist

## Who am I?

I am an energetic, hyperactive adrenaline junkie who sees challenges / issues as opportunities and thrives on improving processes, environments and the general quality of life. Always discovering, always growing. My values are most important to me of which honesty is the main ingredient of my character. My broad knowledge about IT and Business gives me the ability to communicate on both levels and convey meaningful requirements and narrow the (ever present) gap between the two. My passion is to empower people and therefore training lies close to my heart.

English / Afrikaans
